Chhaon छाँव

FOR DOCTORS

Help your patients take the medicines you prescribe

Between visits you can't see whether a prescription is being taken. Chhaon reminds your patient on WhatsApp at every dose time, tells the family when a dose is not confirmed, and gives you a one-page summary at the next visit.

1

A reminder at each dose

On WhatsApp, in Hindi or English. Nothing to install: the patient just replies **1**.

Namaste Papa 🙏
Medicine time 💊 **Metformin 500 mg**
🔵 Blue round tablet
Taken it? Just reply **1**

1 ✓✓

2

The family is told

A son or daughter, even in another city or country, sees each dose and is alerted when one is missed.

🔔 **Night dose not confirmed**
Papa hasn't confirmed Amlodipine (9:00 PM).

3

You see what happened

At the visit the family shows a one-page summary: doses confirmed, medicine by medicine.

Last 30 days	Confirmed
Metformin 500 mg	93%
Telmisartan 40 mg	90%
Amlodipine 5 mg (night)	61%

Sample data, for illustration.

Why it helps your practice

- ✓ **Know which medicine is being missed**, not just that "something" is.
- ✓ **Shorter, better consults:** the family arrives with the medicine list and the last 30 days.
- ✓ **Fewer "how is Papa doing?" calls** from children living away.
- ✓ **Appointment reminders** the evening before and on the morning of the visit.
- ✓ **Nothing for you to set up:** no login, no app, no integration.

Older parents · Pregnancy · Babies and children

Safe and simple

Free. Chhaon is in its pilot; families pay nothing.

Never medical advice. Chhaon reminds and records. It never diagnoses or changes a medicine; the plan stays yours.

Consent first. The patient agrees on WhatsApp before any reminder, and can reply STOP at any time.

Any phone with WhatsApp. The reminder can go to the patient or to whoever gives the medicine at home.

A small ask

1. Keep a few Chhaon QR cards at your reception desk.
2. For a patient on long-term medicines, say: **"Ask your son or daughter to scan this."**
3. At the next visit, ask: **"Do you have the Chhaon summary?"**
